NanoTrainer Rechargeable Remote Dog Training Collar

- The NanoTrainer has an effective radius of 330 yards - Activate and configure your dog's collar from a distance of up to three city blocks.
- Lifetime Warranty - If your collar doesn't meet our standards, let us know. We'll repair or replace it for you. You pay nothing. (restrictions apply)
- Rechargeable via USB - No uncomfortable and bulky battery casings. The NanoTrainer's slim form factor uses USB technology to ensure a snug fit and a reliable charge.'
- We've revamped the NanoTrainer with a bright, clear LCD display - 30% larger than the 2016 model. We've also added a brand new battery service display. You'll have plenty of notice when it's time to change batteries.
- The NanoTrainer is woven from 100% waterproof nylon, and attaches via an unbreakable stainless steel ring. It's comfortable, it's washable, and it will last as long as you need it.
- Misplaced your transmitter? Forgotten to charge your collar? Not a problem. An extra collar and transmitter are included in every box. Keep our backups handy, and you'll never need to worry.
- Ready to go right out of the box - USB charging cable and lithium rechargeable batteries are included at no extra cost. You'll be able to start training your dog in minutes.
- Whether you are training a Pomeranian or an Irish Wolfhound, the NanoTrainer will fit snugly and safely. The collar adjusts easily to fit dogs from 10 to 140 pounds.
- For your dog's comfort and safety, remove the NanoTrainer when your dog is bathing or swimming.

Your dog is a joy to have around. You love her energy, but her constant barking can make things difficult.
Sleeping babies, touchy neighbors and days spent working from home are realities that call for quiet. As your life changes, you want to make sure your dog's behavior can change with it.

The NanoTrainer is a safe and effective training collar that will quickly help you curb your dog's incessant barking. Aversive pet training is a tried and true method of behavioral modification, and now it's never been easier.

Attach the nylon training collar, and configure it with our easy-to-use remote transmitter. A large effective signal radius ensures that you don't need to keep up with your dog to use NanoTrainer.

"If your dog is in sight, your dog is in range."
